**International scientific and practical conference**

**THE KAKHOVKA RESERVOIR DISASTER:  
THE YEAR AFTER TOMORROW AND THE FUTURE OUTLOOK**

6-7 June 2024

**Dear colleagues!**

We invite scientists, researchers, teachers, young scientists, doctoral students, postgraduates, applicants of all levels of higher education, representatives of public authorities and NGOs to take part in the International Scientific and Practical Conference.

**The Conference Themes and Topics:**

Theme 1. Revitalization of the river, biodiversity and habitats: observations and first conclusions.

Theme 2. Social and environmental consequences of the disaster: regional and local development and recovery strategies

Theme 3. Transformation of the economy: ways of development "without water".

**The scientific framework of the conference:** It will soon be a year since the Kakhovka Reservoir disaster occurred because of the destruction of the dam at the Kakhovka Hydroelectric Power Plant. What has happened in the year after the disaster? What impact did it have and will have on the metabolism of natural and social systems, functions with and is related to the presence of water? Many questions remain open, and we aspire to form an interdisciplinary discourse on how the river, nature, and people are living in the new conditions during the first year cycle without a Kakhovka dam and Reservoir.
